Fields & Research Interests

Primary: Development economics; Poverty & inequality; Labour & education economics; Climate shocks & household welfare.
Secondary: Behavioral & experimental economics; Applied microeconometrics / causal inference.

Education

University of Groningen — The Netherlands
PhD, Economics — "Essays on Development Economics" — *2023–2027 (expected)*

- Supervisors: Prof. dr. Viola Angelini; Dr. Agnieszka Postepska
- Graduate coursework: Empirical Methods of Economics; Econometric Analysis of Panel Data; Data Analysis & Machine Learning; Development Economics; Behavioral Economics & Experimental Design

University of Nottingham — United Kingdom
MSc, Economics and Econometrics — *2016–2017*

- Fully funded LPDP (Indonesia Endowment Fund for Education) scholarship; Distinction at the research stage (methodology and dissertation)
- Dissertation: *The Pursuits of Happiness: Consumption, Relative Standing, and Material Aspiration*

Gadjah Mada University — Yogyakarta, Indonesia
BSc, Economics — Cum Laude — *2010–2015*

- Full score (A) on the BSc thesis: *Poverty Dynamics among Rural Households in Indonesia*

Job Market Paper

"Poverty amid Progress: The Hidden Cost of a Cold Shock in Mongolia." (with Lydia Kim). 2026. Background paper for the World Bank 2026 Mongolia Poverty Assessment. Draft available upon request.

- Mongolia's 2023/24 *dzud*, an extreme winter of deep cold, heavy snow, and ice-locked pasture, killed roughly one in seven of the country's livestock while an economic boom sharply reduced national poverty. Using the first nationally representative household panel spanning a major *dzud*, we provide the first quasi-experimental estimate of a cold extreme's effect on monetary poverty. Observed poverty barely changed in the hardest-hit districts; without the shock, poverty would have fallen by roughly 15 additional percentage points and consumption would have grown by about 13 percent more. Affected herders ended the period with herds one-third smaller; non-herders were affected through food markets, with food insecurity rising by 80 percent and caloric intake falling by about 12 percent. The implied consumption loss was four to six times government spending on emergency relief, while an anticipatory transfer piloted before an earlier *dzud* could have reached every exposed herder household at a lower cost.

Working Papers

1. Febriady, Ade, Agnieszka Postepska, and Viola Angelini. 2026. "The Long Shadow: Childhood Poverty and the Returns to Education." GLO Discussion Paper No. 1731. https://www.econstor.eu/bitstream/10419/338969/1/GLO-DP-1731.pdf.
   - This study documents substantial heterogeneity in returns to education by childhood poverty status among Indonesian wage workers aged 15–35. Individuals who grew up poor earn only 1.5 percent per additional year of schooling, less than one-fourth of the 6.8 percent earned by those who were never poor. We estimate these returns using a control-function approach that exploits conditional heteroskedasticity for identification without exclusion restrictions; the control-function coefficient is three times larger among the poor, indicating markedly stronger positive selection into schooling. Descriptive evidence of lower skill accumulation per year of schooling and more limited access to high-paying jobs is consistent with lower marginal returns.

Work in Progress

- *In-Utero Exposure to Mongolia's Dzud and Long-Term Labor Market Outcomes* — a causal mediation analysis through educational attainment (design stage).

Presentations & Conferences

- *The Long Shadow* — Asian Economic Development Conference (AEDC), ADB & ADBI, HKUST, Hong Kong, Jun 2026.
- *Poverty amid Progress* — FEB PhD Conference, University of Groningen, Apr 2026.
- *The Long Shadow* — Dutch Economists Day (NED), Leiden University (The Hague), Oct 2025.
- *The Long Shadow* — Frontiers of Causal Inference & Machine Learning (CIML), IMT School for Advanced Studies Lucca, Jul 2025.
- *The Long Shadow* — Economics seminar, University of Groningen, 2025.

Research & Professional Experience

The World Bank, Poverty and Equity GP — Washington DC & Jakarta (Remote)
Economist / Research Analyst (Consultant) — *Jul 2019–Jul 2026 (intermittent)*

- **Mongolia Poverty Assessment & Fiscal Analysis:** preparing the background study on welfare impacts of harsh-winter (*dzud*) shocks; earlier performed data checks on the 2022 HSES, supported the consumption-aggregate methodology, reviewed Stata code for the poverty estimation, and assembled fiscal-incidence and administrative data.
- **Indonesia COVID-19 High-Frequency Phone Survey (Rounds 1–8):** led instrument design (including an early-child-development module), full data analysis (cleaning, attrition checks, descriptives, regressions), survey-firm coordination, and public dissemination; contributed to a regional-report chapter and policy briefs. *Team received the World Bank VPU Team Award (2021).*
- **WelTrAC — Central Sulawesi disaster response:** five rounds of quarterly panel surveys on affected households; led analysis and reporting and supported dashboard and instrument design. *Team received the HD VPU Team Award (FY2023).*
- **Additional projects:** Indonesia Poverty Assessment 2022; Indonesia Care Economy Survey (PMT design); SD INPRES school-construction long-term effects; ID for Inclusive Service Delivery and Digital Transformation.

Nat'l Team for Acceleration of Poverty Reduction (TNP2K) Indonesia
Econometrics / Policy Analysis Specialist *Dec 2017–Dec 2019*

- Difference-in-differences evaluation of *Nusantara Sehat* on household panel data; authored the methodology and presented findings to the Ministry of Health.
- Co-authored regular poverty notes for the Vice President of Indonesia; produced a poverty-dynamics brief; built a district-level malnutrition index.
- Supported DTKS household targeting (Proxy Means Test) and stunting maps (Small Area Estimation, with SMERU); worked with the Behavioral Insight Team and Bank Mandiri on a microcredit-repayment nudge.

Center for Indonesia's Strategic Development Initiatives (CISDI) Indonesia
Panelist, Impact Evaluation Proposal Selection *Jan 2022*

- Reviewed eight competitive proposals for an impact evaluation of PN-PRIMA (Puskesmas service enhancement; IDR 1.4 billion) and helped select the winning proposal.

Indonesian Presidential Advisory Council Jakarta, Indonesia
Executive Staff to the Chairperson *Jul 2015–Mar 2016*

- Provided regular economic-indicator updates and analytical support for official meetings and visits.

Universitas Gadjah Mada (FEB) Indonesia
Research Assistant, Macroeconomic Dashboard *May 2013–Jun 2014*

- Wrote the fiscal-analysis section of the quarterly *Indonesian Economic Review and Outlook*; contributed data preparation, analysis, and drafting across research projects.

Teaching Experience

University of Groningen The Netherlands
Tutorial Instructor — Empirical Methods of Economics (graduate) *Fall 2026 (incoming)*

- Teaching a tutorial for the course (course led by Prof. dr. Viola Angelini).

Prasetiya Mulya Business School Jakarta, Indonesia
Lecturer — Applied Econometrics (intl. undergraduate) *Aug 2019–May 2022*

- Taught microdata management, robust standard errors, static panel models, difference-in-differences, and binary/multiple discrete-choice models; advised on curriculum development.

Gadjah Mada University (pre-MBA program) Jakarta, Indonesia
Lecturer — Statistics for Business Decision *Aug 2019–Jun 2020*

- Taught descriptive statistics, probability, hypothesis testing, correlation, and regression (international matriculation class).

Awards & Fellowships

- World Bank HD Vice President Unit Team Award — WelTrAC project, FY2023
- World Bank VPU Team Award — Indonesia COVID-19 High-Frequency project, 2021
- BPI LPDP Scholarship (PK-51), Indonesia Endowment Fund for Education, 2016–2017
- Cum Laude, BSc Economics, Universitas Gadjah Mada, 2015
- TF LEaRN (Leadership Enrichment and Regional Networking) Scholarship, Temasek Foundation, NUS, 2014
- 2nd Place, International Challenges on Economic Ideas

Technical Skills & Training

- **Software:** Stata (advanced), R, LaTeX, Claude Code.
- **Methods:** panel econometrics; difference-in-differences; control-function / IV; Proxy Means Test (PMT); Small Area Estimation (SAE); survey instrument design; machine-learning fundamentals.
- **Training:** Mixtape Sessions — Causal Inference I–III (Scott Cunningham), 2025; Instats — Difference-in-Differences with Panel Data (Jeffrey Wooldridge), 2025; LSE — Data Science and Big Data Analysis, 2017; Timberlake — Econometrics for Program Evaluation using Stata, 2017.

Languages

Indonesian (native); Buginese (native); English (professional working; language of MSc/PhD instruction).
